PROFILE

I am a web and mobile application developer with more than 2 years of experience in development using Laravel and Kotlin. In addition, I also have strong interest and hands-on experience in graphic design, especially using Canva to create visually appealing content, UI assets, and social media materials. I am also able to utilize AI tools to improve design workflow, accelerate content creation, and enhance development efficiency. Accustomed to working both independently and in teams, I focus on efficiency, code quality, and timely project completion. Actively working on various freelance projects, I continue to hone my technical skills and am committed to continuous learning and development.
